

TACTICAL

by Custom Glass Solutions

Custom Glass Solutions introduces the next evolution in Officer safety: Optishield Tactical™ Bullet Resistant Glass

For too long, our first responders have gone unprotected in their vehicles, leaving them vulnerable to ambush style attacks. **Optishield Tactical** replaces OEM glass in all current patrol vehicle platforms, providing invisible, level NIJ3A ballistic protection for both windshields and side glass. This unparalleled protection is visibly indistinguishable from OEM glass, and still allows the user to raise/ lower the side windows normally. Advanced materials, OEM level environmental testing, and independent ballistic testing assure you of the absolute best product available in today's rapidly evolving threat environment.

With over five decades of expertise in glass fabrication technology, Optishield Tactical by CGS employs exclusive construction features to deliver superior, lightweight tactical transparent armor solutions.

- **Proprietary Ballistic Advantage™ Strike Surface**, our unique technology rapidly expands bullets on impact, dramatically reducing penetration and dispersing energy more effectively than ever before!
- **CGS employs its exclusive ATC Core™** (Advanced Tactical Core), utilizing advanced materials and cutting-edge technology to efficiently disperse bullet energy, delivering unparalleled ballistic performance.
- **Optisafe™ by CGS** – a revolutionary proprietary layer embedded in our transparent armor, offers cutting-edge protection. Crafted to eliminate spall (debris and fragments released into the vehicle), Optisafe guarantees heightened eye safety in ballistic impacts by containing glass fragments within the windshield's ballistic stack. Take your safety to new heights with Optisafe.

Custom Glass Solutions products are manufactured proudly in the USA and are available nationwide through Dana Safety Supply as a component of their **BallisTech™** line of Vehicle Armor Solutions.

Optishield Tactical, proudly manufactured in the USA, sets the gold standard for premium transparent armor solutions meticulously designed for the Law Enforcement sector.

Optishield Tactical ensures superior protection that exceeds level NIJ3A requirements, utilizing cutting-edge ballistic materials. Empowering every law enforcement agency with the capability to provide top-tier, life-saving security for their officers.

Also available with shoot out capability.
