

TACTICAL

by Custom Glass Solutions

OPTISHIELD TACTICAL™ Bullet Resistant Glass

The premier transparent armor solution for law enforcement vehicles

For too long, our first responders have gone unprotected in their vehicles, leaving them vulnerable to ambush style attacks.

Optishield Tactical replaces OEM glass in all current patrol vehicle platforms, providing invisible, level NIJ3A ballistic protection for both windshields and side glass. Indistinguishable from OEM glass, Optishield Tactical allows the user to raise/ lower the side windows normally. Advanced materials, OEM level environmental testing and independent ballistic testing are all part of the best transparent armor product available in today's rapidly evolving threat environment.

- **Enhanced LE protection** with NIJ IIIA ballistic performance in a lightweight, independently certified ballistic product.
- **Seamless OEM fit and functionality**; invisible protection with fully functional door glass.
- **Superior optics** and clarity manufactured in US-based OEM glass facilities to OEM glass standards.
- **Return-Fire™** capability engineered for Officer safety, tactical response at the ready.
- **Nationwide availability** as part of the Ballistech armoring package through Dana Safety Supply with industry-leading warranty and service.

With more than five decades of expertise in glass fabrication technology, Optishield Tactical by CGS employs exclusive construction features to deliver superior, lightweight tactical transparent armor solutions. Proudly manufactured in the USA, Optishield Tactical is available nationwide through Dana Safety Supply as a component of their Ballistech™ line of Vehicle Armor Solutions.

Available Configurations:

- Windshields
- Door glass
- Rear glass (trucks)
- Available for all major LE vehicle platforms
